## Description:

One cubic yard of compost weighs approximately 950 to 1150 pounds. Vision Comp compost is processed using windrows. Vision compost acts as a slow release of plant nutrients, increases soil moisture holding capacity, improves soil structure, increases soil organic matter content, increases microbial activity, and improves drainage-

## Descripción:

Una yarda cúbica de compost pesa aproximadamente de 950 a 1150 libras. El compost Vision Comp se procesa utilizando hileras. El compost de visión actúa como un liberación lenta de nutrientes para las plantas, aumenta la capacidad de retención de humedad del suelo, mejora estructura del suelo, aumenta el contenido de materia orgánica del suelo, aumenta la actividad microbiana, y mejora el drenaje-

## Transportation:

Large orders shipped in End-dump and Super 10 trucks. Smaller orders shipped on flatbeds
